Art Unit: 3731

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-31, 37, 38 and 44-47, drawn to an expandable medical device with a locking mechanism, classified in class 623, subclass 1.15.

II. Claims 48-53, drawn to an expandable medical device, classified in class 623, subclass 1.15.

III. Claims 32-36, drawn to a method of processing an expandable medical device, classified in class 623, subclass 1.19.

IV. Claims 39-43, drawn to a method of constructing an expandable medical device, classified in class 623, subclass 1.11.

2. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claim 1 does not include the particulars of the hinges being tapered as defined in claim 48.

Art Unit: 3731

The subcombination has separate utility. For example, it could be used without the locking mechanism defined in the group I claims.

3. Inventions III and (I and II) are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process. For example, it could be made without the expanding and restoring steps defined in claim 32.

4. Inventions IV and (I and II) are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process. For example, it could be made without the retracting and retaining steps defined in claim 39.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3731

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Thaler whose telephone number is (703) 308-2981. The examiner can normally be reached Monday to Friday.

8. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael J. Milano can be reached on (703)308-2496.
